## SUMMARY

---

GTM Engineer with 7+ years of B2B SaaS revenue experience and hands-on engineering depth across Python, TypeScript, SQL, APIs, and multi-step LLM workflows. I build the AI-native content production systems that make brands visible to both search engines and LLMs - end-to-end pipelines spanning research, drafting, editorial quality gates, CMS publishing, and measurement, plus the topic-cluster and schema architecture behind AI discoverability. Sharp editorial judgment for spotting and killing generic LLM output, backed by a quota-carrying enterprise sales background and full-funnel analytics instrumentation.

## SELECTED SYSTEMS BUILT

---

- **AI content production system ("War Machine"):** Designed and built an end-to-end programmatic SEO/GEO content pipeline - keyword and competitor research, AI drafting, a six-point editorial gate (factual accuracy, brand voice, legal, SEO, differentiation, GEO-readiness), and Python markdown-to-Webflow CMS publishing. Produced 11 long-form, practitioner-grade pages targeting high-authority, zero-competition queries.
- **Topic architecture & schema for AI discoverability:** Owned topic-cluster architecture and internal linking, with FAQ, Organization, and Article JSON-LD schema and answer-shaped lead paragraphs on every page - engineered for citation in ChatGPT, Claude, Perplexity, and Google AI Overviews, not just blue-link rank.
- **Editorial quality engine (anti-AI-slop):** Built a multi-gate AI editor and a daily brand-content engine (RAG of company context + trained brand voice + live trade-news synthesis) with deliberate imperfection injected so output reads human - holding a clear line on when AI content is publishable versus slop.
- **LLM workflow engineering:** Production multi-step AI workflows with accountability for output quality - deterministic logic separated from LLM judgment, confidence scoring, independent AI quality gates, evals, and observability, so a failure is a recoverable state rather than a stoppage.
- **Search & paid visibility instrumentation:** Uncovered \$81K in misdirected ad spend and a negative keyword blocking core-ICP search, then rebuilt campaign architecture; built a custom analytics app integrating GA4, Google Ads, and Google Search Console with a BigQuery layer correlating content and ad performance to pipeline.
- **GTM signal & routing infrastructure:** Built an 8-stage product-led trial-conversion pipeline (signup to scored, routed, sales-ready opportunity in under 90 seconds at under \$0.04/lead) and an autonomous outbound engine across 150+ mailboxes that cut campaign launch from ~8 hours to ~3 minutes and client CAC by ~90%.

## PROFESSIONAL EXPERIENCE

---

### Founder & Principal GTM Engineer

**Smoothed.io** | Los Angeles, CA

Dec 2022 – Present

*GTM and content engineering consultancy building AI content production and revenue automation - content pipelines, GEO, signal scoring, enrichment, outbound, CRM workflows, and analytics for B2B SaaS and e-commerce clients.*

- Built a daily AI content engine for an e-commerce brand: a RAG of company context + a trained brand-voice ruleset + live trade-news synthesis (Shopify and Klaviyo ecosystem) generating daily LinkedIn content and founder-voice engagement, with deliberate error injection so output reads as a person, not a model.
- Built an 8-stage product-led trial-conversion engine for a B2B SaaS client: raw trial signup → AI enrichment → Mixpanel product-signal extraction → hybrid ICP scoring → deterministic routing → AI lead-dossier + first-touch email → independent AI quality gate; signup to sales-ready opportunity in under 90 seconds at under \$0.04/lead.
- Built a multi-source buying-signal pipeline (Reddit, Hacker News, X, GitHub) capturing ~1,100 signals/day into Supabase Edge Functions / pg\_cron with LLM tiering, deterministic qualification, and Slack-based human-in-the-loop routing for Tier-1 intent (<4hr SLA).
- Architected an autonomous outbound and enrichment engine across 150+ mailboxes via Smartlead API; reduced client CAC by ~90% and campaign launch time from ~8 hours to ~3 minutes, with CRM handoff across Close, Day.ai, Twenty, and HubSpot.
- Separated deterministic logic from LLM judgment across routing, scoring, validation, and subjective classification; confidence scoring, independent AI quality gates, evals, and observability throughout - reducing hallucination risk and cost while preserving automation speed.

### Contract GTM Engineer

**GovSignals** | Remote

2026 – Present

*FedRAMP High authorized AI compliance platform for federal contractors. Sole GTM engineer across content production, analytics, and paid acquisition in an IT security and compliance domain (FedRAMP, NIST 800-171, CMMC, DFARS).*

- Designed and built "The War Machine," an end-to-end content production pipeline (research → AI draft → six-point editorial gate → Webflow CMS publish), and produced 11 long-form, practitioner-grade compliance pages (FedRAMP High, NIST 800-171, CMMC, CUI, DFARS, IL5, ITAR) targeting high-authority, zero-competition queries where competitors had no coverage.
- Built topic-cluster architecture, internal linking, and FAQ/Organization/Article JSON-LD schema across a /compliance/ hub, with answer-shaped openers and primary-source citations (NIST.gov, FedRAMP.gov) - engineered for LLM citation across ChatGPT, Perplexity, and Google AI Overviews.
- Audited Google Ads and uncovered \$81K in misdirected spend plus a negative keyword blocking core-ICP searches; rebuilt campaign architecture toward uncontested compliance keywords.
- Built a custom executive revenue-analytics app (Vercel) integrating GA4, Google Ads, and Google Search Console, with a BigQuery layer correlating content and ad performance to pipeline; plus a corpus enrichment pipeline (998 lines, 27 passing tests) connecting keyword data to knowledge bases via embeddings, chunking, retrieval evaluation, and quality gates.

#### Vice President of Sales

Jul 2022 – Feb 2023

**Crealytics** | Los Angeles, CA

*Predictive marketing intelligence platform and retail media SSP. Laid off due to company restructuring.*

- Closed 2 full-service clients accounting for \$1.45M total revenue in first 5 months.
- Restructured outbound motion into an ABM approach, improving reply rate by +157%; hired and onboarded a BDR.

#### Sales Director

Jun 2020 – Jul 2022

**Skai (FKA Kenshoo)** | Los Angeles, CA

*Enterprise predictive marketing intelligence platform.*

- Exceeded quota: 143% Year 1, 111% Year 2; managed full-cycle enterprise sales with complex buying committees.
- Closed the company's largest app sale: HBO Max at \$800K ACV; partnered with solutions architects and TAMs on custom API integrations and technical discovery with enterprise IT.
- Managed enterprise compliance workflows involving PII, CCPA, and GDPR, translating buyer requirements into technical and operational next steps.

#### Enterprise Account Executive / Team Lead, SDRs

Sep 2017 – Jun 2020

**Conversion Logic** | Los Angeles, CA

*Multi-touch attribution and marketing data platform.*

- Closed 2 accounts in first 60 days (\$390K ARR); contributed to a 31% increase in total ARR during tenure.
- Partnered with Marketing, Data Science, and Engineering on attribution modeling integrations, data-ingestion standards, and enterprise analytics requirements.
- Oversaw 2 SDRs and improved MQL generation by +67% in Year 1.

## TECHNICAL STACK

---

**Languages:** Python, TypeScript, SQL, Node.js

**Content & GEO:** Webflow CMS, JSON-LD schema (FAQ / Article / Organization), topic-cluster architecture, internal linking, taxonomy, SEMrush, GA4, Google Search Console, Google Ads API, LLM citation / AI Overview optimization

**AI / LLM Workflows:** Claude API, ChatGPT / Codex, OpenRouter, RAG pipelines, embeddings, vector retrieval, prompt workflows, evals, observability, output validation, deterministic scoring & routing

**Data / Infra:** Supabase, PostgreSQL, pgvector, BigQuery, Railway, Vercel, Supabase Edge Functions, pg\_cron, OAuth, REST & GraphQL APIs, webhooks, database triggers, event streams

## EDUCATION & CERTIFICATIONS

---

BA, Business Administration - Loyola Marymount University • AWS Certified Cloud Practitioner (2023) • MEDDPICC Masterclass Certification (2023)
